

Reghardt Pienaar

React Developer & Musician

I am a self taught React developer who is intrinsically motivated to deliver the best and most inspired work I can. I love building modular applications and writing elegant and reactive code. I have persisted through this journey by continuously looking for better ways to solve my problems and experimenting with more engaging, unique and immersive user interactions. Nothing drives me except for my passion and commitment to do the best job I can. I would love to join a team of developers.
